television studio
lighting circa 1957

THE HISTORY

John B Masson & Associates was founded in 1953 by John B and Marie T Masson, as a specialist commercial lighting supplier. At the time John had experience working in electrical wholesale and was employed as an announcer for the radio station 3DB in Melbourne. He hosted many radio programmes through the 1940's when radio was the principle entertainment medium. Through John's connections with commercial radio, arts and electrical wholesale, the young couple seized the exciting opportunity, to begin manufacturing lighting for the newly established television stations Australia wide in 1956. In the beginning the work was undertaken at home in

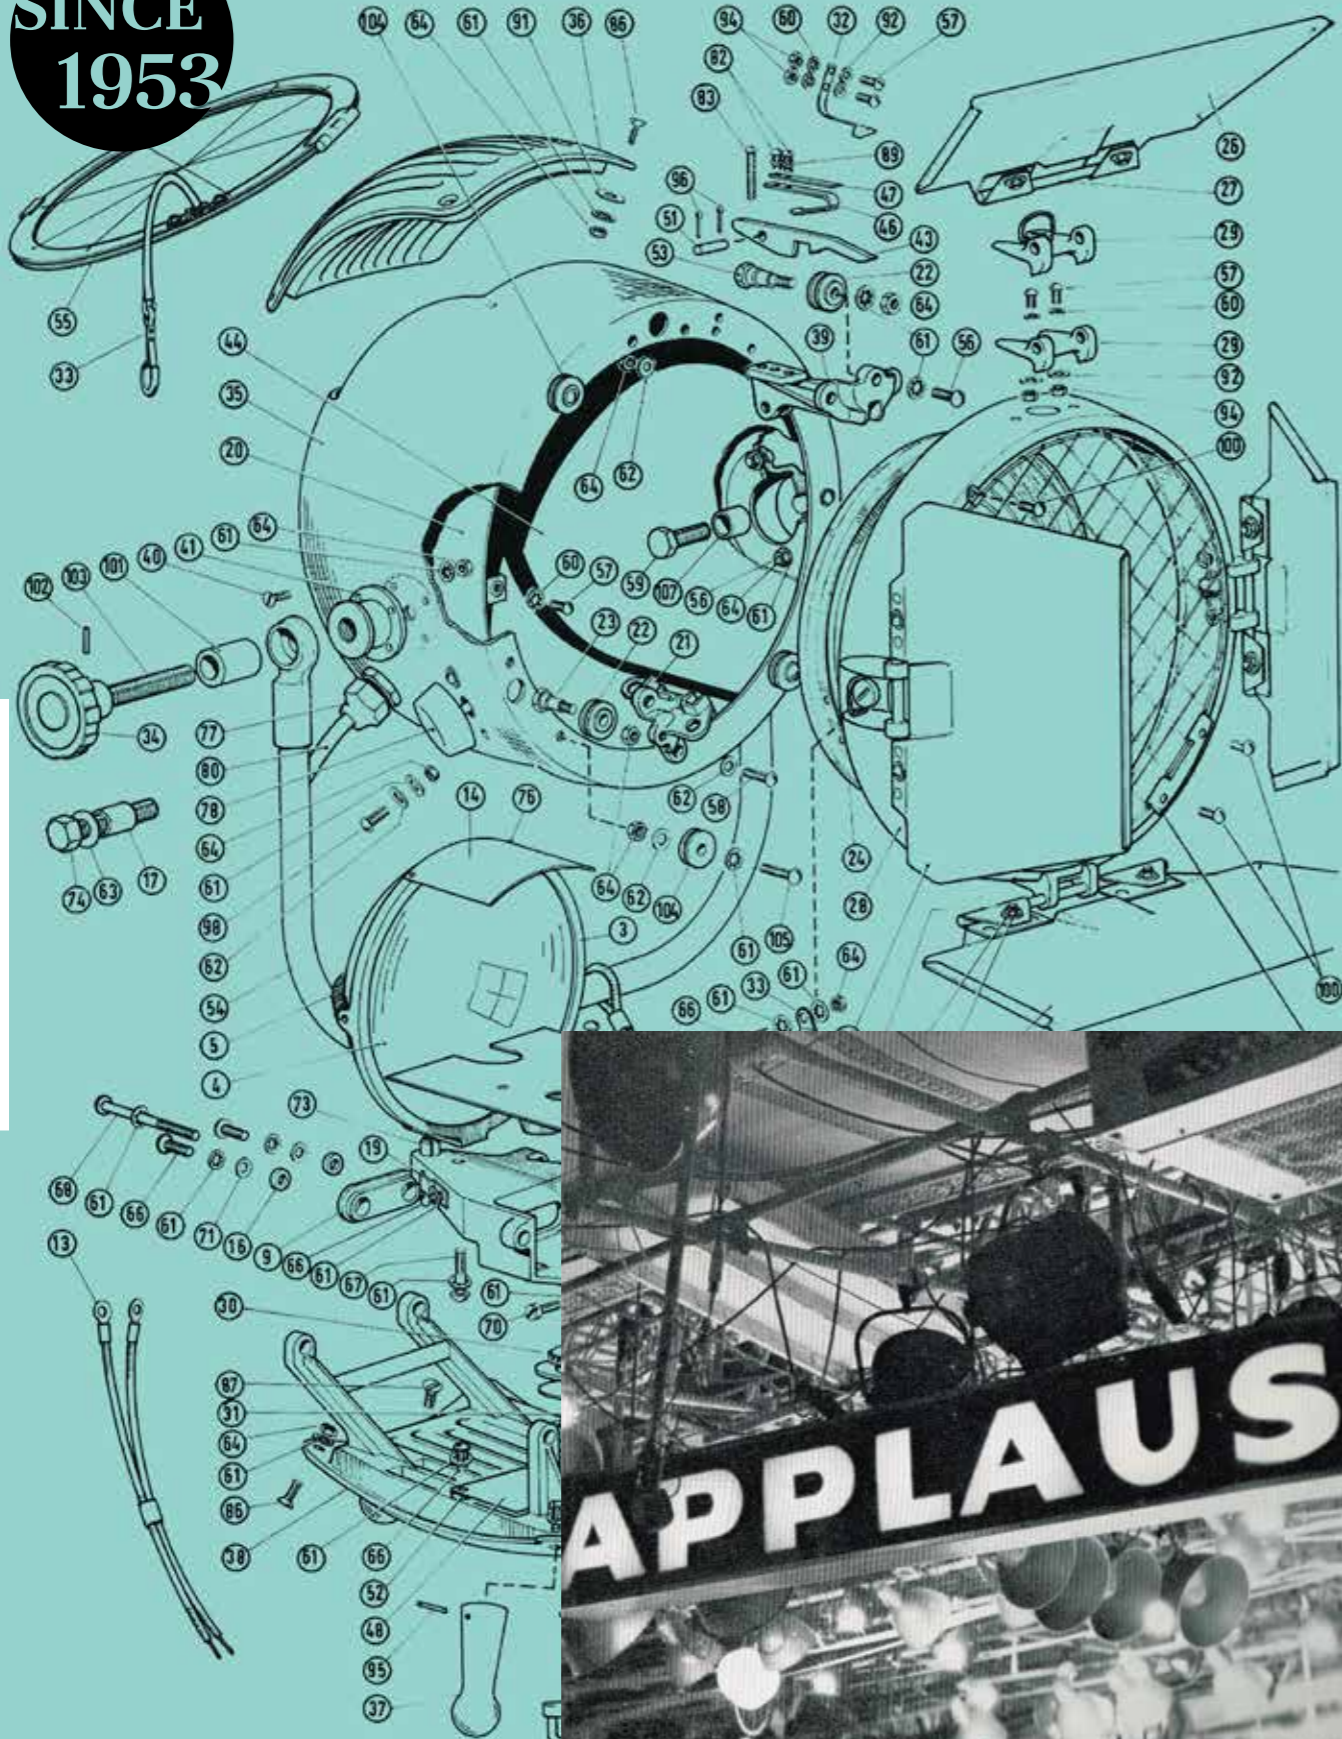

a large rented flat in Kew. The business grew rapidly and a factory warehouse was soon established in Collingwood.

The company further prospered in the early 1970's, through its involvement with Australian Film as the industry came of age. A lighting rental business was established which serviced the film, television and advertising industries. These connections led to the involvement with some iconic Australian clients including the ABC's Countdown and several other television productions, as well as the lighting design of the world famous Myer Bourke St christmas windows.

SINCE 1953

THE HISTORY

8

GIANT 'APPLAUSE' LIGHT INSTALLED AT CHANNEL 7 TELETHEATRE

In 1982 John & Marie's son David Masson joined the business. After business studies and experience working in television lighting and staging. The youthful energy and passion for customer service was instrumental in broadening the companies focus to include architectural lighting. The business name was changed at this time to 'Massons' reflecting the multiple Masson's who worked together.

In the late 1980's Masson established a distributor in Sydney for the new range of low voltage lighting. Shortly thereafter other distributors were established throughout Australia. As the business expanded nationally, John B Masson purchased three sites in Research to accommodate the company's expected growth in the ensuing years. A new Head Office, factory and warehouse were constructed and the business was renamed "Masson For Light". John B Masson passed away in 1993 and Marie Masson in 2009 leaving a substantial legacy of achievement.

JOHN B MASSON

THE HISTORY

9

Further expansion of the business occurred in the 2000's with a showroom opening in Redfern, Sydney and a branch in Brisbane. A retail showroom was then opened in Richmond, Victoria in 2010. In the same year Sarah Masson, daughter of David, joined the business as a Graphic Designer, directing the branding of the company. The new user friendly Masson For Light website was created and is now regularly updated with new and exciting products & projects.

Over 60 years, Masson For Light continues to focus on the design and manufacture of quality architectural lighting. With a factory in Melbourne it is possible to customise products for those clients wanting something a bit different for their individual projects. Today, company Director David Masson along with a fantastic team of staff including; salespeople, lighting designers, engineers and tradesmen, work closely on projects with award winning Architects and Interior Designers.

DAVID J MASSON

IGLU

65 Mary Street, Brisbane

"The proposed building will set a new benchmark for student accommodation in Brisbane. Students will enjoy accommodation with high levels of residential amenity and access to extensive communal facilities set within a sub-tropical garden. Pattern, texture and colour provide an animated architecture that enriches its surroundings and expresses the vitality of student life."

PRODUCTS: APOLLO LED

JARDAN

522 Church St. Richmond, VIC

Masson For Light, was commissioned by Jordan to supply all light fittings and to complete lighting calculations & design for the new flagship store in Church St Richmond. A perfect fit, two Australian owned companies working together to illuminate beautiful Australian designed & made products.

Products: Z8 spot 15w with high colour rendering
900 lumen with medium flood with antiglare covers.

Minimal COB downlight with the
MLX 10.w 1000 Lumen COB LED

Beama Wallights E27 LED with the
MLX 10.w 1000 Lumen COB LED

Three circuit track

The client brief for the two story space was to provide a homely welcoming atmosphere while making the display of the products center stage. Energy efficiency was also a critical factor in the brief to keep in line with the Jordan carbon neutral foot print. Spotlights with high colour rendering for accent lighting gave depth and contrast combined with downlights also used for general lighting for circulation zones.

Richmond

The lighting supports various functional zones for product display, work space and common areas. Masson achieved a very credible result using only 3.63 W/m² at an average of 700 Lux, utilizing the very latest LED light engines from Europe.

Z8

European design 15W LED track light. Ideal for general commercial, retail and gallery applications. Many other track head options available.

Beama Up & Down

Extruded aluminium body. Anodising available for inner & outer. Various LED light sources available.
