

MASSON
FOR LIGHT

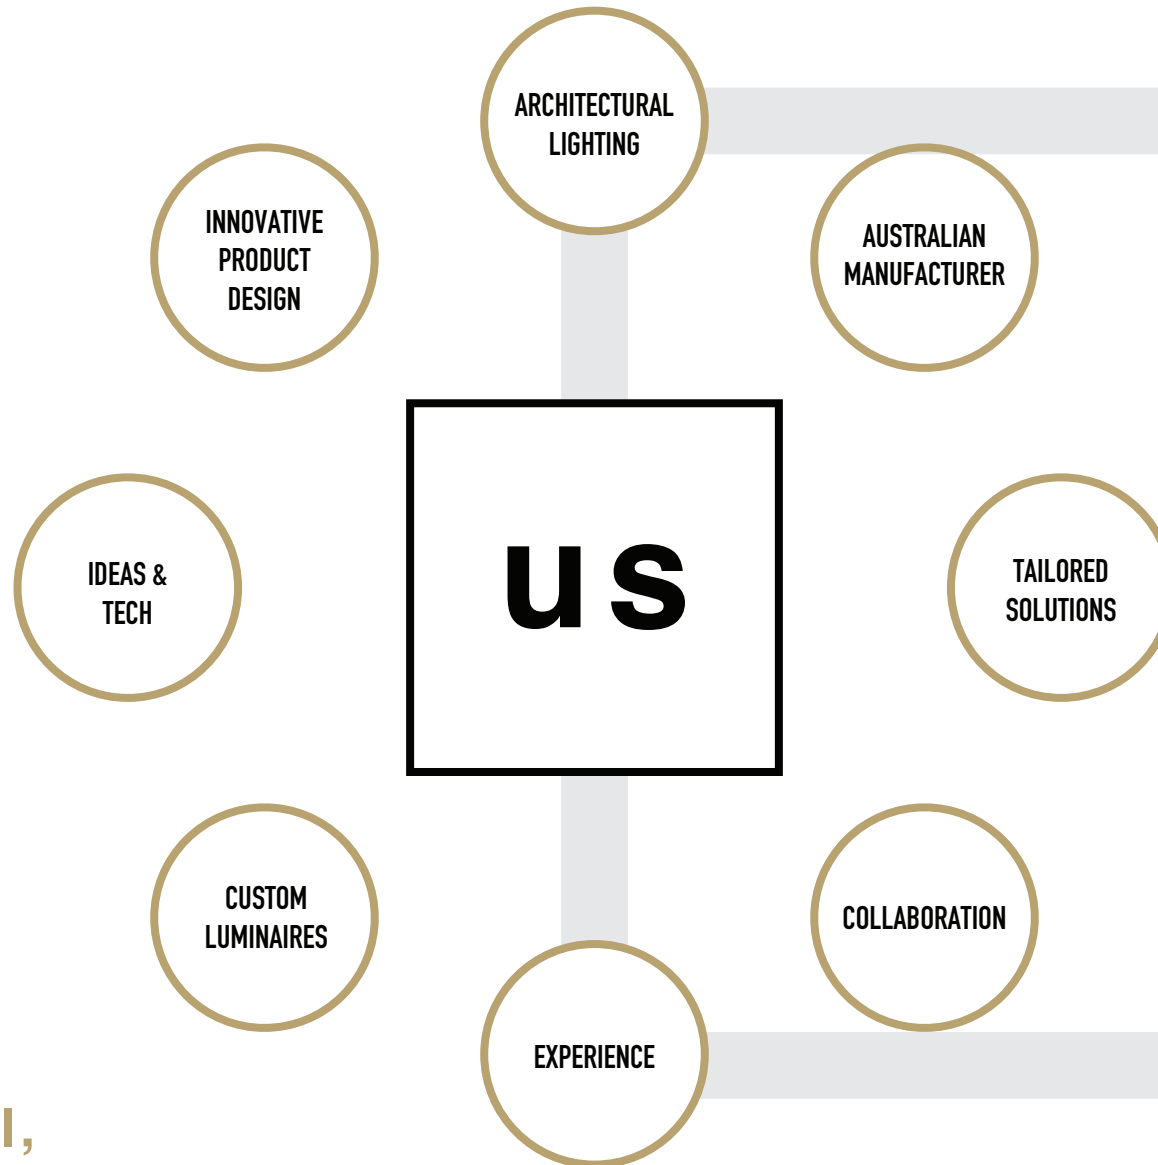

about

For over 60 years, Masson For Light have manufactured quality lighting in Melbourne, Australia. Specialising in architectural lighting for commercial, retail, hospitality, residential and public spaces.

Our focus is on innovative product design and lighting solutions tailored to suit each project. With a factory in Melbourne it is possible to customise products for those clients wanting something a bit different for their individual projects.

Today, a fantastic team of staff including; Lighting Designers, Sales Staff, Engineers and Craftsmen, work closely on projects with award winning Architects and Interior Designers.

coppin st by musk studio

Hannes McNamara of MUSK Architecture Studio identified a new application for our standard 80x80mm extrusion. The extrusion was cut on an angle and custom fabricated as an LED wall light to complement the angular proportions of the apartments, hence the Australian Made Coppin wall light by Masson was created.
